The Editor has retracted the article, as images in Fig. 4a Xiaoyaosan and Fluoxetine, and Control and Fluoxetine, overlap, despite different experimental conditions. For Fig. 5, the NeuN images for the control and Fluoxetine samples appear to overlap. The authors have provide some underlying data but it did not sufficiently address

the concerns. The Editor therefore no longer has confidence in the integrity of the data in this article.

Author Liu Yan has stated on behalf of all authors that all authors disagree with the retraction. Published online: 16 January 2025
